PROFILE

I have a strong foundation in .Net C# & VB, React.js, Node.js, and the fundamentals of TypeScript. Additionally, I have extensive knowledge of SQL Server and SQL reporting server, experience with DevOps and entry-level in cloud computing, Agile development practices, and project management. In my previous employment, I successfully delivered two big projects, a recruitment system and with my colleague, a revenue collection system, that integrates with banks and mobile money (MPESA)
